PREMEDICAL, PREDENTAL, PREVETERINARY STUDIES

Program Overview
Rider University offers students with baccalaureate degrees the opportunity to take the undergraduate science course prerequisites for medical, dental, veterinary or graduate school. Students may apply through the College of Continuing Studies (http://www.rider.edu/academics/colleges-schools/college-continuing-studies/programs-offerings/degrees-certificates-working-adults/premedical-predental-prevet-studies).

Curriculum Overview
This program is highly individualized. Students work closely with the Premedical Studies advisor to develop a plan of study that will meet their educational goals. In addition to basic core prerequisites, the program offers the opportunity to take courses in advanced biology and biochemistry to further prepare the student for successful preparation in medical, dental, or veterinary school. A typical post-baccalaureate program includes the courses listed below:

Contact
Bryan Spiegelberg, Ph.D.
Associate Professor
Chair, Premedical Studies Committee
Department of Chemistry, Biochemistry, and Physics
Science Hall 319D
609-896-5000 ext.7729

Program Website: Premedical (http://www.rider.edu/academics/colleges-schools/college-continuing-studies/programs-offerings/degrees-certificates-working-adults/premedical-predental-prevet-studies/medical-school-prerequisites)

Program Requirements
Applicants must complete a Post-baccalaureate Premedical Studies application form, submit official transcripts from all higher education institutions attended, and complete an application (http://www.rider.edu/academics/colleges-schools/college-continuing-studies/programs-offerings/degrees-certificates-working-adults/premedical-predental-prevet-studies/medical-school-prerequisites) to the College of Continuing Studies.

Applicants must meet the following criteria to gain admission to the Post-baccalaureate Premedical Studies Program:

- a baccalaureate degree from an accredited college or university
- a 3.25 cumulative undergraduate GPA.

Applications are reviewed and approved by the College of Continuing Studies and the chair of the Premedical Studies Committee.

1 MTH 105: Algebra and Trigonometry is a prerequisite.

BIO 115 Principles of Biology I 4 Credits
An introductory biology course focusing on major themes of biology: what is life?, Cells as fundamental structure and functional unit of life; information transmission, storage and retrieval; Diversity and unity of life explained by evolution. Three hours of lecture and one three-hour lab per week.

Corequisite(s): BIO 115L.

BIO 115L Principles of Biology I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 115.

BIO 260 Principles of Biology: Evolution, Diversity, and Biology of Cells 4 Credits
Lectures and labs focus on basic cell biology. Cell diversity and function, genetics and biotechnology are emphasized. Three hours of lecture and one three-hour lab per week. Prerequisite(s): BIO 115/115L and BIO 116/116L or BIO 115, BIO 117, (BNS 118 or BNS 275).

Corequisite(s): BIO 260L.

BIO 260L Principles of Biology: Cells Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.

Corequisite(s): BIO 260.

BCH 325 Biochemistry I 3 Credits
Outlines the chemistry and biological function of carbohydrates, proteins, lipids, nucleic acids, vitamins, and enzymes, and introduces enzyme kinetics and biological energetics. Degradative metabolic pathways of carbohydrates and lipids, and their controlled interrelationships are discussed in detail.

Prerequisite(s): CHE 214.

CHE 120 Principles of Chemistry 3 Credits
For students who have successfully completed one year of high school chemistry. This systematic study of the fundamental principles and concepts of chemistry covers atomic structure, bonding, stoichiometric relationships, including solution and oxidation-reduction reactions, and molecular structure. Three hours of lecture per week. Prerequisite(s): High school chemistry or CHE 100 is recommended before taking this course.

Corequisite(s): CHE 121.
CHE 121 Principles of Chemistry Lab 1 Credits
For students concurrently taking CHE 120. Experiments involve gravimetric, volumetric, and spectrophotometric quantitative analysis. One three-hour lab per week. Fall.

CHE 122 Intro to Chemical Systems 3 Credits
A continuation of CHE 120. For students majoring in the sciences but may be taken by others. Chemical systems in which the study of kinetics, thermodynamics, equilibrium, and radiochemistry are emphasized. Three hours of lecture per week. Prerequisite(s): CHE 120, MTH 105 or higher.
Corequisite(s): CHE 123.

CHE 123 Quantitative Methods Lab 1 Credits
Usually taken concurrently with CHE 122. Primarily for students majoring in the sciences. A number of quantitative classical and instrumental methods of analysis are used to determine thermodynamic properties and reaction mechanisms. One three-hour lab per week. Prerequisite(s): CHE 121.
Corequisite(s): CHE 122.

CHE 211 Organic Chemistry I 4 Credits
The structure, chemical properties, and methods of preparation of the more important classes of carbon compounds are studied, with an emphasis on the relationship of structure, stereochemistry, and conformation to chemical reactivity. The preparation and reactivity of organic functional groups is introduced. The use of infrared and nuclear magnetic resonance spectroscopy, and mass spectrometry for elucidating structures of organic molecules is discussed. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 122, CHE 123.
Corequisite(s): CHE 211L.

CHE 211L Organic Chemistry I Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 211.

CHE 214 Organic Chemistry II 4 Credits
A continuation of Chemistry 211, emphasizing the mechanism of organic reactions, structural interpretations of properties, preparations, reactivity and identification of organic compounds. Three hours of lecture and one three-hour lab per week. Prerequisite(s): CHE 211.
Corequisite(s): CHE 214L.

CHE 214L Organic Chemistry II Lab 0 Credits
This lab is a co-requisite and must be taken with the corresponding course.
Corequisite(s): CHE 214.

MTH 105 Algebra and Trigonometry 4 Credits
Algebraic functions, trigonometric functions, identities and conditional equations, inequalities, exponential and logarithmic functions.
Prerequisite(s): A mathematics SAT score of 570 or ACT score of 26, or a mathematics SAT score of 550 or ACT score of 23 plus a passing score on the Algebra section of the math and science majors placement test.
Prerequisite(s): MTH 100S or MTH 102.

PHY 100 Principles of Physics I 3 Credits
Introductory noncalculus physics with applications for pre-professional, biology, and geological, environmental and marine sciences majors. Classical mechanics, energy, mechanical waves, fluid statics and dynamics, thermodynamics. Elements of modern physics are interwoven with those of classical physics from the beginning. Not open to chemistry, physics, or mathematics majors. Three hours of lecture per week. Prerequisite(s): MTH 105, MTH 210, MTH 211 or MTH 212.
Corequisite(s): PHY 100L.

PHY 100L Principles of Physics I Lab 1 Credits
For students concurrently taking PHY 100. One three-hour lab per week.
Corequisite(s): PHY 100.

PHY 101 Principles of Physics II 3 Credits
Continuation of Physics 100. Electrostatics, electricity, and magnetism; DC and AC circuits, physical and geometrical optics, introduction to elementary particle and quantum physics. Three hours of lecture per week. Prerequisite(s): PHY 100.
Corequisite(s): PHY 101L.

PHY 101L Principles of Physics II Lab 1 Credits
For students concurrently taking Physics 101. One three-hour lab per week.
Corequisite(s): PHY 101.
